

CLAIMS

1. A method for transducing a gene into T cells, wherein said method comprises the step of contacting a paramyxovirus vector carrying the gene with activated T cells.
5
2. The method according to claim 1, wherein the paramyxovirus vector is a Sendai virus vector.
3. A method of preparing T cells transduced with a foreign gene, wherein said method
10 comprises the step of contacting a paramyxovirus vector carrying said gene with activated T cells.
4. The method according to claim 3, wherein the paramyxovirus vector is a Sendai virus vector.
15
5. A T cell transduced with a foreign gene prepared by the method according to claim 3 or 4.
6. A paramyxovirus vector to be used in gene transduction into activated T cells.
- 20 7. The vector according to claim 6, wherein the paramyxovirus vector is a Sendai virus vector.
